2nd Myanmar Insurance Summit

6-7 March 2018, Yangon, Myanmar Theme: "Ushering In the New Growth Wave"

ll eyes are on Myanmar for 2018 which will be the year to usher in the new wave of transformation for the insurance industry. Insurance reform is now said to be a priority and the government is expected to issue more insurance licenses. This move and liberalization are eagerly awaited as Myanmar is one of the last frontiers with enormous opportunities predicted to hit \$2 billion in premiums by 2030.

There is a long queue and insurance companies are waiting patiently to get a real quick footing in the market with economic growth in mining, agriculture, fisheries, energy and infrastructure development across a huge population base of 55 million.

How will the industry be transformed? What are the real opportunities in Myanmar and how best to tap into these high-potential opportunities? What are the strategic tips to win in the insurance game in Myanmar today? Can Myanmar rise to the challenge?

With the phenomenal success of the first Myanmar Insurance Summit in 2014, Asia Insurance Review is proud to bring the 2nd Myanmar Insurance
