The shadow of the pandemic still looms, and the insurance industry has barely been able to catch its breath, having been battered again and again by the waves of COVID-19. But there are hopeful signs. While the path to a full recovery may not be smooth and may take longer than initially anticipated, the roundtable will provide a high-level dialogue on key challenges facing the industry today, key leadership lessons learned through navigating the past two years and much more.

Be part of the conversation and take a ringside seat to the action as you will be given plenty of food for thought!

Discussion topics:

- A new era of rising inflation and the impact of interest rates and product pricing
- HR management challenges of working from home
- Impact of geopolitics on the insurance industry; what is end game of pandemic? Did insurance come out better or worse?
- Social media and insurance?
- Inflation and making efficient use of available capital
- Protecting the brand from reputational damage
- Political risk
- Cyber insurance for consumers

Log on and watch anytime, anywhere
