The 60th Diamond Anniversary Conference celebrates the East Asian Insurance Congress's history in the market. The EAIC was founded in 1962 with the aim of furthering and developing international collaboration in the field of insurance. In line with the Diamond reference, the theme of the event will be "Cutting a Multi-Faceted Clear Vision for the Industry."

The theme revolves around the 4C's of a quality diamond and we felt it was a fitting theme for this milestone, the Diamond Jubilee.

The programme will focus on Cut, Colour, Clarity and Carat in exploring how the industry will evolve in the coming years, especially after a tumultuous 2 years of surviving with a pandemic. The key takeaways are to look at the competition, climate, consumer mindset, connectivity as well as conflict post the Covid pandemic – key areas that must be addressed for companies to stay relevant and focused.
